## **Put Litter In Its Place**

Hi friend, it's me Rocksey. I need your help to keep Louisiana beautiful. **Draw lines to help me sort the waste into the right container.** Only four items belong in each bin.

## **Compost**

Waste that decays naturally into food for plants.

Waste that can be made into new materials.

## Trash

Waste that takes a very long time to decompose or can't be used again.

I know all waste isn't the same. It's divided into three groups based on whether or not it can be used again — compost, recyclables, and trash for landfills. It's important to reduce the trash we create by composting and recycling so we send less to landfills.

Compost - Leaf, Fish Bone, Apple Core, Egg Shell Recycle - Plastic Bottle, Plastic Bag, Cereal Box, Aluminum Can Landfill - Candy Wrapper, Diaper, Coffee Cup, Toothbrush
