Agents in the field

Agents processing a litter scene

Its not always fun or clean

Again its not easy

It's also time consuming

Camera Program

- In 2023 LDWF was given a \$50,000 grant by the Keep Louisiana Beautiful Foundation so that new camera equipment could be purchased.
- With that money the following equipment was purchased for the program.
 - Thirty one cell cameras (Vosker).
 - Eight Axis pinhole cameras.
 - Six Axis security cameras.
 - One Axis dome camera.
 - Camera hardware--- batteries, power cords, etc.
- Equipment distributed throughout the state to each Region office (8).
- Each Region has one Agent assigned to the Litter Task Force and are tasked with utilizing this equipment to work litter enforcement sites with his/her fellow Agents.

Camera Program History

- Developed a camera surveillance program within the last six year. All of which started in Region 5.
- Areas that have cameras have resulted in a number of littering cases and now it is subsequently less.
- Citizens recognize that LDWF is an aggressive agency for investigating dumpsites and enforcing the litter statutes.
- Parish District Attorneys and Police Juries support the LDWF litter enforcement program by increasing prosecution of littering cases and acquiring equipment.

Camera Equipment Purchase with KLB Grant
